Contraflow Plans

Radio Coverage Areas

Interstates 59 and 55 Contraflow Plans

In an effort to assist the state of Louisiana, MDOT will implement contraflow (lane reversal) for both I-59 and I-55 when requested by Louisiana and approved by the Governor of Mississippi. Category III, IV or V hurricanes in the Gulf of Mexico are situations that might cause a mandatory evacuation of the greater New Orleans area. [Contraflow operations *cannot* be considered on Highway 49].

- The decision to contraflow is NOT automatic and will only be used when absolutely necessary. Citizens **should not delay** their evacuation plans in anticipation of contraflow.
- The I-59 contraflow operations would begin in Louisiana, extend into Mississippi, and end just south of Hattiesburg.
- The I-55 contraflow operations would begin in Louisiana, extend into Mississippi, and end just south of Brookhaven.
- All exits within the contraflowed sections of the interstate highways will remain open as traffic conditions allow. Law Enforcement Officers will be present to assist with traffic control.
- The shoulders of both Interstates 59 and 55 should be kept clear for emergency vehicles. Motorists needing to stop should use the next available exit.
- Hancock County residents traveling West into Louisiana on I-10 will be routed North onto I-59 at the I-10/I-12 split.
- Tune-in to Mississippi Public Broadcasting radio stations for emergency information and updated road conditions [see Radio Coverage Areas].

Hattiesburg Traffic Control

MDOT will enforce the following procedures in the Hattiesburg area to avoid severe congestion at the intersections of three major routes.

- **Northbound traffic on Hwy 49** may NOT be allowed to exit at either Hwy 98 or I-59.
- **Northbound traffic on I-59** can ONLY exit at Hwy 11 [Exit 60] or West on Hardy Street/Hwy 98 [Exit 65].
- **Westbound traffic on Hwy 98** may NOT be allowed to exit onto Hwy 49, but directed to merge onto I-59 instead.
